

Flower Mound, TX

This week's Certified Dank McMansion of the Week™ comes to us from the town of Flower Mound, TX, which is a surprisingly euphemistic name for a small town in a heavily conservative state.

Obviously, the builders took the name of the town to heart when designing this house - and not the "Flower" part either.

This lovely **6,390 sqft 4bd, 4.5ba** estate (realtors love that word) built in **1994** is currently selling for All of those fun exterior details are **actually made in a factory** from injected foam, painted, and then glued onto houses like this one. They don't even attempt looking like real stone, preferring to go with a smooth, blinding white.

As always, our tour begins with the trademark **Cathedral of Useless Space™** (aka the Front Entryway):

The tile grout is a nice touch.

The “Great” Room

McMansion Hell

So glad that buying furniture as a set is considered tacky now.

BONUS VIEW:

McMansion Hell

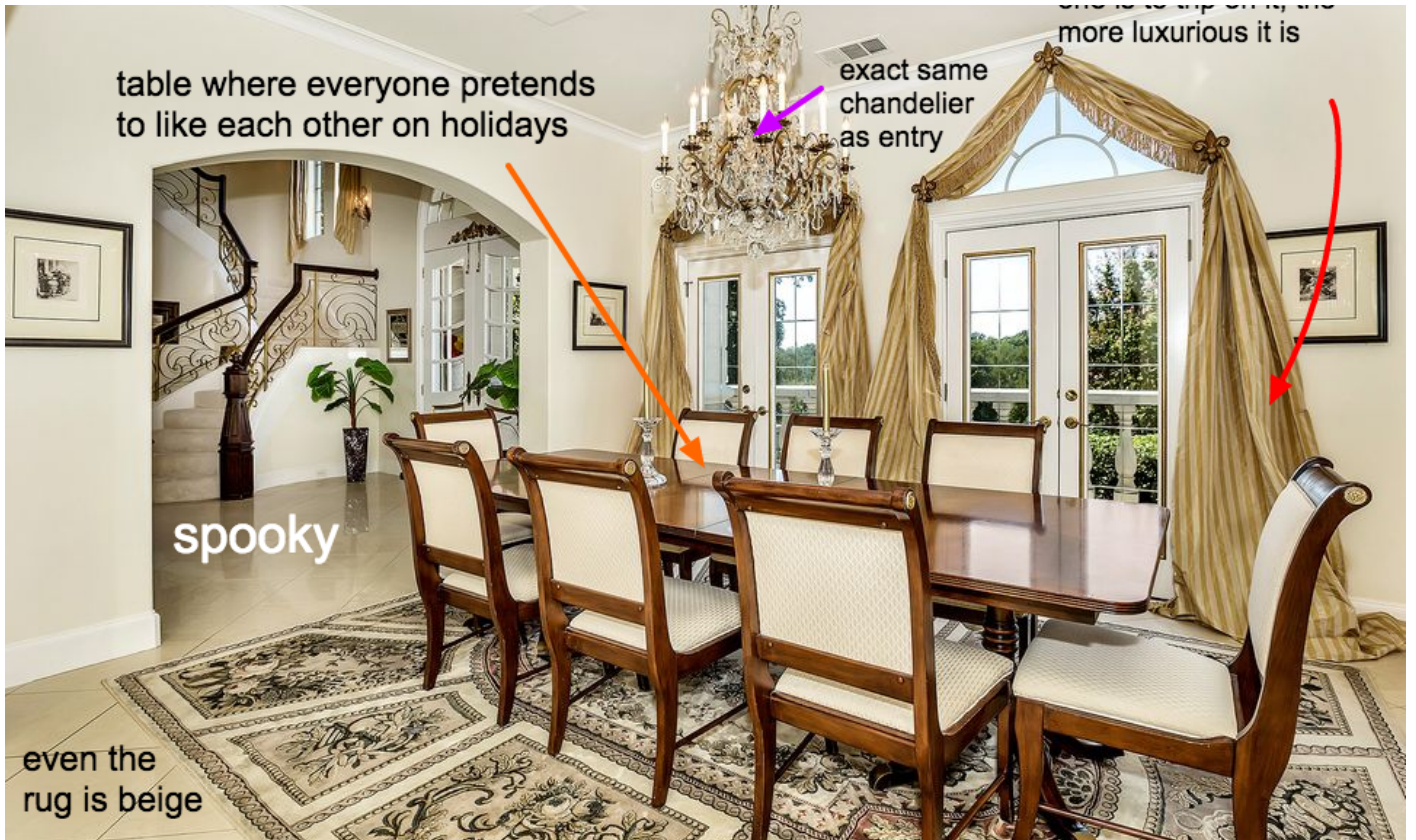

It's like an olympic-sized swimming pool of beige.

Dining Room

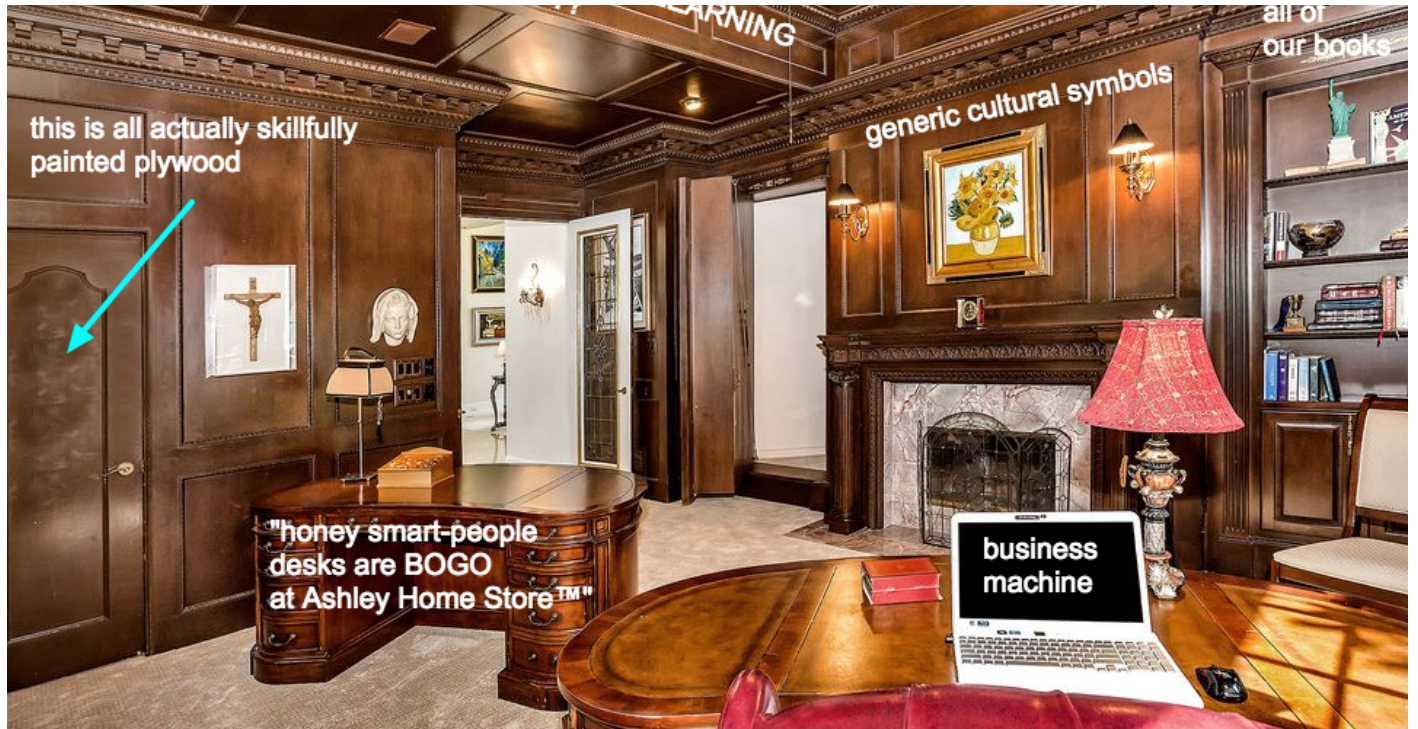

McMansion Hell

I've yet to see a more unremarkable room.

The Study

Look closely at the door, and you can see how poorly the wood was joined. Also, why is there some sort of cultural association of “dark wood-paneling” with “moody genius”??

The **SECOND** Living Room

McMansion Hell

BUT MCMANSIONHELL!! How do you *know* HGTV was a Thomasville shill in 2005??? How can you make such bold claims???

WELL READERS, ***HERE IS A SCREENSHOT OF HGTV.COM FROM 2005!!!!***

Designer's Notes

With a stone wall in the background and dark wood floors, delicate furniture could easily have gotten lost in such a strong room. Instead, Thomasville designers countered strength with even more strength. This dynamic sofa from the Ernest Hemingway collection with its contrasting colors, patterns and textures was clearly up to the task, taking its place as the focal point of the room.

The Kitchen

Now at this point, the homeowners were wondering how they could conjure up the tackiest, 2000s-est kitchen possible. Now I can't say they did a *perfect* job, but they came pretty damn close

McMansion Hell

That stove combo has to win some sort of McMansion Razzie award for “Worst Kitchen Decision” but I don’t want to jump the gun too soon, y’know?

The Master Bedroom

McMansion Hell

On a side note, where can I get that tiny chair bc it would be perfect for my spoiled cat

Master Bathroom (warning: dankness ahead)

Children's Room?

Should I be concerned? Is there a hotline for this??

Bedroom No. 2

McMansion Hell

The empty frame was for the diploma Amy would've earned if she weren't a total disappointment.

That's enough beige for me. I'm starting to lose my ability to see color.

Alas, our tour has come to a close, but not before we view what is arguably the worst part of every McMansion: The rear elevation.

Well, that does it for this week's Certified Dank McMansion™! Stick around for Sunday's post- McMansions 101: Eclecticism!
